

Jordan Tourism Board

Dear Friends & Partners,

After a turbulent 2020 we are looking forward to a return to normalcy. As vaccinations continue to roll out globally we believe that we will go back to normal soon and that we will return to business as usual. The situation in Jordan continues to improve and we have now reached a point where we are flattening our curve and easing some of our restrictions. Travel related procedures are now as follows:

- The 7-day self-quarantine imposed on all travelers into the Kingdom has been waived.
- All passengers must provide a valid negative PCR test taken within 72 hours of their departure to Jordan and must take another PCR test upon arrival into the Kingdom at their own expense.

Any developments or updates to current procedures will be shared with the tourism sector and the public as soon as they become official.

This will be the first step to the eventual reopening of all sectors and the return to normalcy. We wish you all a successful and healthy 2021.

We look forward to welcoming you back to Jordan soon.

Please accept my warmest regards,

Dr. Abed Al-Razzaq Arabiyat

Managing Director
